SUMMARY

Backend-focused Software Engineer specializing in scalable API development, authentication systems, and distributed architectures. Experienced in building production-grade systems using Node.js, Express.js, and MongoDB. Strong expertise in system design, performance optimization, and secure backend development with a solid foundation in data structures and algorithms.

SKILLS

JavaScript, Python, Node.js, Express.js, REST APIs, MongoDB, MySQL, JWT Authentication, API Design, System Design, Git, GitHub, Docker, Postman

PROJECTS

AI Workflow Automation System (Backend)

Mar 2026

- Designed scalable backend workflows using Node.js and REST APIs to automate complex business operations.
- Connected external services through modular API layers, increasing system flexibility.
- Lowered response time by 25% by streamlining middleware execution and request flow.
- Built reusable service modules, cutting code duplication by 30%.

Secure User Management API

Jan 2026

- Developed secure RESTful endpoints implementing JWT-based authentication and role-based access control (RBAC).
- Reinforced data security using bcrypt hashing and validation pipelines.
- Improved query efficiency in MongoDB, reducing data access time by 20%.
- Organized application structure using MVC architecture to support scalability.

Portfolio Website (Full Stack)

Aug 2025

- Created a full-stack application using React.js and Node.js for dynamic content handling.
- Facilitated seamless data exchange via RESTful communication between client and server.
- Boosted application performance through rendering and backend optimizations.
- Deployed the system in a production environment ensuring high availability.

EDUCATION

Bachelor of Technology in Computer Science Engineering

NIMS University, Jaipur

Aug 2023 – 2027

RELEVANT COURSEWORK

Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

ADDITIONAL

- Strong understanding of backend architecture, API security practices, and performance tuning techniques.
- Knowledge of debugging strategies, testing workflows, and scalable system design principles.
